Hi Bettie,

I didn't receive a response from Dennis on the email below. Is there something else that needs to be done to get the work order number in place? Thank you for your assistance.

Subject: Philip Morris protocol 466-04

Hi Dennis,

I am the Clinimetrics Project Manager working with Hans-Juergen Roethig and Bettie Nelson on protocol 466-04. We have recently signed a work order and will begin work on this project next week. As we learned from our experience working on protocol 466-03, a work order is needed for processing the invoices. Although we will not have an invoice for this project until mid-September, could you please let me know what information you need from us to begin the process of generating this work order number?

Kind regards,
Aimee
